What is a.OCX file? An.OCX file is a generic file wrapper that allows the operating system to recognize it as an "operating system component", which allows for certain application programs to install and then "use" it without incurring the normal security threat that would be associated with a standard (non-wrapper) file. You should NOT install or try to use an.OCX file unless you are familiar with doing so, and only do so if you are running Windows Vista or newer. What is the advantage of installing the .OCX file? The advantage of installing and using the.OCX file is that it allows all of the various applications that will eventually use it (like the Cozi Outlook Toolbar) to "behave" just as though they were accessing that other application from the Internet directly. Downloading the.OCX File Install the.OCX file: When you are using the.OCX file, each time you need to use it, simply double-click the file to run it. Selecting the.OCX File option: When you are creating the.OCX file, you may want to create the option to run it by double-clicking it as well. NOTE: The double-clicking option is not provided by default (I didn't create it), so you will have to install it separately. The download for the.OCX file is the following: Getting the Plugin File To Work: Even though all of the software that will use the.OCX file is installed on your computer, you may need to download the.ocx file to your computer. You need to locate the file "atobe.ocx" and copy it to your desktop in your My Documents Folder. While you have the Cozi Outlook Toolbar installed on your computer (and Cozi and Cozi Outlook Toolbar are both enabled), you can view your Cozi appointments on your PDA, or any device that synchronizes with Outlook. Installing The.OCX File Open up your web browser and navigate to the page for the file you downloaded. Double-click on the.OCX file and follow the onscreen instructions. Try to access your Cozi appointments on your PDA, or other device that synchronizes with Outlook. 09e8f5149f

Cozi Outlook Toolbar is a FREE addon for Outlook that allows you to synchronize your Cozi calendar with Outlook in no time. With the Cozi Outlook Toolbar addon, you'll have access to your Cozi calendar from any location. You can see your Cozi calendar appointments on your PDA or any device that syncs with Outlook. Once you install the Cozi Outlook Toolbar addon, you'll see your Cozi appointments on your desktop. You can synchronize your appointments and your calendar details with Outlook. The Cozi Outlook Toolbar adds the Cozi calendar as a Pending Invitations subfolder in the Outlook task folder. If you are using the standard version of Cozi, this is done automatically. If you are using the Standard version or Standard Modem 2.0 Beta version of Cozi you need to install the Toolbar to achieve this. The toolbar allows you to use commands such as 'Send by email' and 'Send to Contact'. You can even use the toolbar to set the status of an event (Not yet started, Arrived, Finished, Cancelled, etc.) The Cozi Outlook Toolbar also allows you to schedule your Cozi appointments, to receive reminders about upcoming appointments, and to reschedule them. You can also see your Cozi calendar as a separate list in the Outlook window. You can easily access your Cozi calendar in all the Outlook windows. ***The Cozi Outlook Toolbar will not add the Cozi Toolbar to the Pending Invitations window in Outlook 2003. This is because the Cozi Outlook Toolbar is written to work with the Task View window in Outlook 2003.*** Similar add-ons: Virtual Address Book: InstantSync - Outlook: More add-ons by z3950: Virtual Address Book: iSync - Outlook: Paragon Desktop - Outlook: Similar add-ons: Outlook Express User Agent: It Works!
